FASTPAK[◇]
Single Use Instrumentation

FASTPAK[®] Single Use Instruments includes:

Features

- Single use, size specific instruments delivered individually
- Ream Through Single Use Femoral Trial
- Clear Tibial Baseplate Trial for improved sizing and cut visualization
- CR and PS single use inserts available in 9mm, 11mm and 13mm
- Insert trials are color coded for easy identification

Benefits

- Reduced instrumentation required for surgery
- Less preparation required for OR set-up and turn over than conventional surgery
- Streamlined surgical procedure (with no change from standard technique)
- New, sterile, single use instruments delivered for every surgery

For detailed product information, including indications for use, contraindications, precautions and warnings, please consult the product's applicable Instructions for Use (IFU) prior to use.
