ACUFEX[®] ACCESS
Positioning System

Customize your lateral decubitus positioning needs without complexity¹

Smith+Nephew's ACUFEX[®] ACCESS Positioning System was designed with ease-of-use in mind. By providing limb abduction, rotation, flexion and optional lateral traction controls, our dedicated system allows you to customize your positioning solution to meet both technique and repair site needs without complexity.¹ This lightweight² and stable^{3,4} solution gives you unimpeded access¹ to the repair site. ACUFEX ACCESS Positioning System puts the control in the surgeon's hands by providing precise shoulder positioning within the sterile field.^{1,5}

It's easy

Simple set up and easy-to-use control points so you can focus on what you do best.¹

It's modular

Optional lateral traction makes both standard and advanced positioning configurations possible all while freeing up staff from supporting the operative arm during procedures.

It's draped

System drapes allow for surgeon control and intraoperative adjustments within the sterile field eliminating the need for component sterilization.

The **ACUFEX ACCESS Positioning System** includes a cart and is portable² with a small storage footprint.

Optional Lateral Traction Boom

Designed to increase access to the repair site. Length and height is adjustable allowing for a range of positions to meet varying patient sizes and surgeon preference.⁵

Cable Management

Take the guess work out with a single point of weight attachment and eliminate the need to tie knots with a reusable cable and hook.

Universal Clamp

Conveniently attaches to any standard OR table while eliminating the need for adaptors.^{1,6}

Flexion Control

An easy-to-turn hand control is used to flex and extend the arm.^{1,5}

Abduction Lever

A simple press of the lever allows surgeons and staff to abduct or adduct the arm within the sterile field.

Internal and External Rotation

Our unique, rotation control allows surgeons and staff to rotate the arm in one fluid motion within the sterile field.¹ Simply rotate and release to stay in a fixed position.

Internal padding is designed to protect the neurovascular bundle at the wrist from excess pressure.

Ordering information

ACUFEX® ACCESS Positioning System	
Reference	Description
72205268	ACUFEX ACCESS Positioning System includes: ACUFEX ACCESS Positioning System ACUFEX ACCESS Cart
72205103	ACUFEX ACCESS Lateral Traction Boom
