**SUTUREFIX ULTRA XL**  
Suture Anchor

The only soft anchor for hip repair that tells you when it's deployed, with a click.

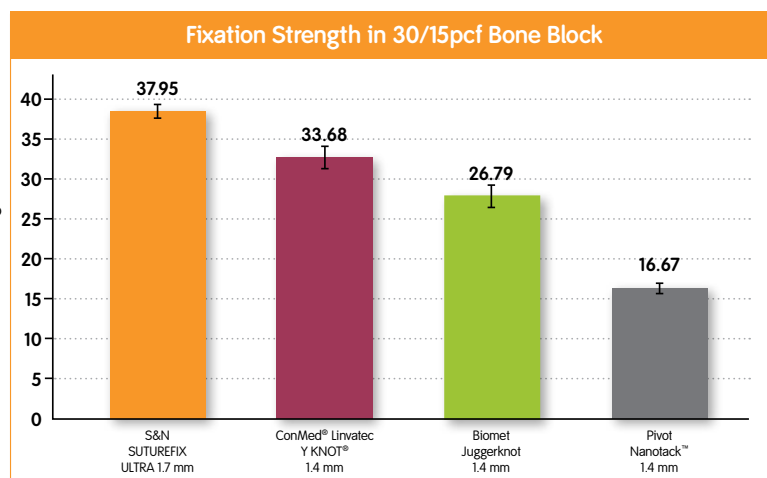

Your go-to anchor  
when space  
is limited.

## SUTUREFIX<sup>®</sup> ULTRA XL Suture Anchor

Designed especially for hip the SUTUREFIX ULTRA XL allows you to fine tune your labral repair by adding fixation points where you couldn't before.<sup>1</sup>

- Small, strong, soft, all-suture anchor, out performs traditional and all-suture devices in pullout strength.<sup>2</sup>
- Anchor construct consistently forms itself against the steel inserter – not the cortical layer as with competitive soft anchors – so deployment is more reliable, reproducible, and less dependent on bone density.<sup>3</sup>
- Ensures successful deployment into the bone with an audible “CLICK.”<sup>4</sup>
