

Functional constructs
through elegant design

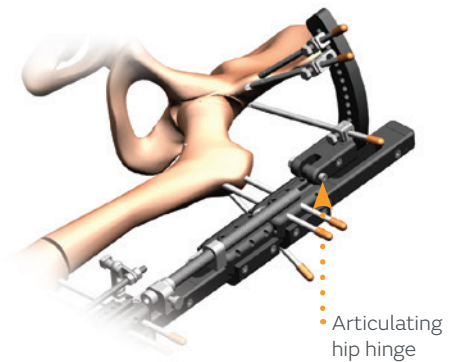

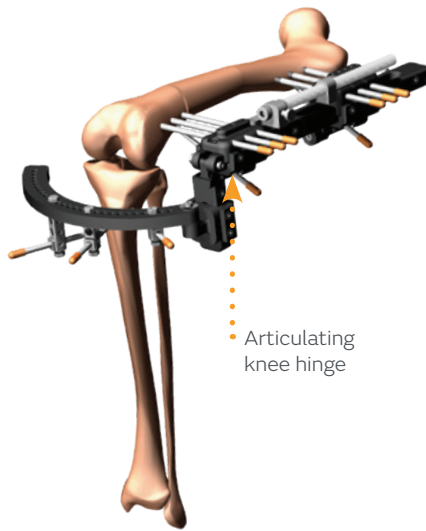

The Smith+Nephew MODULAR RAIL SYSTEM

Offers compatibility with TAYLOR SPATIAL FRAME[◊] and ILIZAROV[™] External Fixators.

Provides joint spanning, allowing range of motion and protection of adjacent joints during lengthening.

Pin fixation is inspired by the Rancho Cube method. HA Coated Pins are available in 4.5mm and 6mm thread diameter.

**Simplify your unilateral external fixation practice today.
Ask your Smith & Nephew representative about the Modular Rail System.**
