SPORTPORT®  
Flexible Cannula

Distributed by **Smith+Nephew**

# The SportPort<sup>®</sup> cannula,

is a soft, flexible cannula that accommodates a surgeon's access and range-of-motion in the joint space. It is designed for easy insertion with a cannulated disposable obturator.

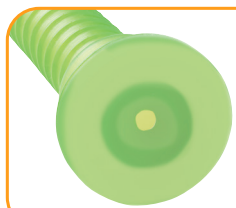

The cannula's flexibility streamlines the surgeon's procedure by facilitating access to anatomy. Available in two sizes, it is designed to adjust to the surgeon's diverse clinical needs.

The patented DistalDrive™ system and flexible construction make Sportport clinically effective in any shoulder repair procedure. It preserves all the best features and ease-of-use of a conventional hard portal cannula and builds them into a new, flexible portal system. The disposable driver pushes the cannula at the distal tip, from inside, pulling the rest of the soft cannula with it.

The easy-to-use SpeedClip™ adjusts the compression to a range of tissue thicknesses. The SpeedClip aids traction on the capsule tissue to maximize working space. It also streamlines procedures by facilitating suture tie-offs in the flanges.

Floating seal design aids distention and contributes to optimal fluid management.

## Ordering information

SPORTPORT Cannula	
Reference #	Description
72205350	SportPort 8.5mm x 60mm Cannula
72205351	SportPort 6.5mm x 60mm Cannula
3801	Reusable Switching Stick, Non-Cannulated
6905019	Reusable Switching Stick, Cannulated
